Me

I am an analytical and visually oriented person whose core values include growth and development in my career and in my everyday life.

In my free time, I enjoy music and maintain my fitness at the gym. A new area of interest is game development, where I can creatively combine my skills.

EXPERIENCE

3/2016 - 2025

CONSTRUCTION AND LOGISTICS SECTOR

📅 3/2016 - 2025 📍 RAKENNUS/LOGISTIIKKA ⌚ PART TIME

Worked through various temporary staffing agencies in construction and internal logistics roles, including the Sairaala Nova project for 3.5 years from the foundation phase to the final transfer of the X-ray equipment. Other clients include Lumon, Porrassalmi Oy, YIT, NCC, Pohjola, Lapti, VRP. P2V and Jalon Rakentajat.

EDUCATION

FORMAL AND OTHER

Previously studied mechanical, production, and energy engineering at Turku University of Applied Sciences (152/240 credits). However, my interests shifted more towards the construction industry. Started studies in autumn 2023 at Jyväskylän University of Applied Sciences (Information Technology/Business Administration, Bachelor of Business Administration) with a specialization in web application development. Also studying through various online platforms, including data analytics, Python programming, graphic design, leadership, and negotiation skills (Udemy, HubSpot, EduHouse, Khan Academy).

Certifications: Google Analytics • Google Ads • Graphic Design Theory
